Working Prototype Known Problems Report

ProStudy

11/23/2016

Problems Found:

- When the user inputs a very long task name, the task name is not totally visible in the graphs
- Sometimes graphs take a while in loading
- Sometimes tasks take a while in being displayed
- If the user stretch the window, it may look weird
- If the user input non-integer for time or an extremely large time, it may result unexpected consequences. The app seems to be fully working on internet explorer.
